Conflict Minerals Compliance Statement

For over a decade, the trade in conflict minerals has fueled human rights abuses and promoted insecurity in eastern Democratic Republic of the Congo (DRC). The Dodd Frank Wall Street Reform and Consumer Protection Act, passed by the US Congress in July 2010, includes a provision – section 1502 – aimed at stopping the national army and rebel groups in the DRC from illegally using profits from the minerals trade to fund their fight. Section 1502 is a disclosure requirement that calls on companies to determine whether their products contain conflict minerals – by carrying out supply chain due diligence – and to report this to the Securities and Exchange Commission (SEC).

Trenton Systems is a privately held corporation and as such we are not subject to the Conflict Minerals rules and reporting requirements. We understand that our customers may be, and we are committed to helping our customers comply with their reporting requirements.

Trenton Systems supports the aim of Conflict Minerals in improving the protection of human health and the environment through better and earlier identification of the intrinsic properties of human rights abuses in the Democratic Republic of Congo and other conflict zones.

Trenton Systems is continuously striving to ensure that we're providing our customers with information about substances in our products as required.

This statement is valid unless superseded by a revised statement at a later date.

EU WEEE Compliance Statement

The European Union (EU) WEEE Directive, 2012/19/EU of July 2012, supersedes the original directive, 2002/96/EC of January 2003, and is implemented through national regulations in all European Economic Area (EEA) countries including all EU member states, Norway, Liechtenstein, and Iceland.

Trenton Systems complies with the EU WEEE Directive and EEA national regulations, as applicable.

Information for Users

According to the timelines and requirements of European Union member state WEEE legislation, the following user information is provided to customers in English for Trenton Systems products subject to the WEEE directive.

This symbol on the product or on its packaging indicates that the product must not be disposed of with normal household waste. Instead, it is your responsibility to dispose of your waste equipment by arranging to return it to a designated collection point for the recycling of waste electrical and electronic equipment. By separating and recycling your waste equipment at the time of disposal you will help to conserve natural resources and ensure that the equipment is recycled in a manner that protects human health and the environment.

This certification is valid unless superseded by a revised certification at a later date.

REACH Compliance

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Commission (EUC) Regulation on chemicals and their safe use (EC 1907/2006) entered into force on June 1, 2007.

Trenton Systems supports the aim of REACH in improving the protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances.

Trenton Systems is continuously striving to ensure that we're providing our customers with information about substances in our products as required.

This certification is valid unless superseded by a revised certification at a later date.

RoHS Compliance Statement

Trenton Systems is continuously striving to ensure that our products conform to the European Union's Restriction of Use of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive 2011/65/EU (RoHS2). Restricted substances include:

- Cadmium(Cd)
- Mercury
- Lead(Pb)
- Hexavalent chromium (Cr6+)
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ethers (PBDE)
- Bis(2-Ethylhexyl) phthalate (DEHP)
- Benzyl butyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Diisobutyl phthalate

Any trace impurities of these substances should be below the threshold limits as specified by the RoHS directive; specifically, Cr+6, Hg, Pb, PBB, PBDE do not exceed 1000 ppm (0.1%) and Cd does not exceed 100 ppm (0.01%).

Trenton Systems supports the aim of RoHS in improving the protection of human health and the environment through better and earlier identification of the intrinsic properties of chemical substances.

Trenton Systems is continuously striving to ensure that we're providing our customers with information about substances in our products as required.

This certification is valid unless superseded by a revised certification at a later date.
